THE TEXAS PANHANDLE.

migrant and Capitalist. Following is a letter to General G. M.

Dodge regarding the agricultural resources of the Texas Panhandle: CLARENDON, DONLEY COUNTY, TEX., 7 General G. M. Dodge, New York City. DEAR SIR-In response to your inquiry | respectfully,

regarding the agricultural possibilities of the Panhandle of Texas, I beg leave to state that an i system of farming is all that is required R. G. Dun & Co.'s Report for the Week to develop the resources of the country, devoted, most exclusively to stock raising A study of the Flora or natural wild vegetation is almost the only possible means by which we can determine sive snow storms late in April, with stripraise. In the present gradual development | at this date around New York account of the country three distinctive systems for the little embarrassment in the va-The first is adapted exclusively to stock Land is ploughed, and sown in corn, sor-

ghum, millet, cats or rye, if the grain does not head, it is cut for fodder and fed to will serve as an illustration of the style of farming mentioned, corn with a horse seeder (corn planter) run, and the rows are worked and kept clean; when the corn is made it is gathered by hand with the snuck, thrown main until it is either fed to beef steers or sold. The stalks are cut by a mowing machine, gathered stacked the same as hay and fed dur-

ing the winter months to stock. In this way one man is enabled to take care of 100 acres of land. The bigh price of grain and dewhich it is done is that while it costs as much to do the work as the return is employment is given to men who have to be retained. The second class of farming is done by emigrants from other states, who, coming to Texas, pursue the same system and plant the same kind of grain as they did where they came from, and con inue in their course until they either acquire some sense of the fitness of

of the country, reason by anology and plant seed in accordance. These men finding certain plants indigeous to the soil closely examine the natural vegetation and planting the domestic family of the same germs, are invariably successful in raising crops. Of the Flora of the Panhandle it may

be generally stated that fully threefourths are of the top-rooted families, and of these fully threefourths are of the legume, or poc-bearing species, which comprises the sensitive plant, trifolia or three-"The Great Spirit never willed it!" known as the tumble weed, is also indigenous to the soil! sage and lake. They each grow on a short trick stalk, terminating in a full, any disturbance in the usual trade and
